

1.)import the project

2.) run npx ts-node src/index.ts

 Server is running on http://localhost:3000

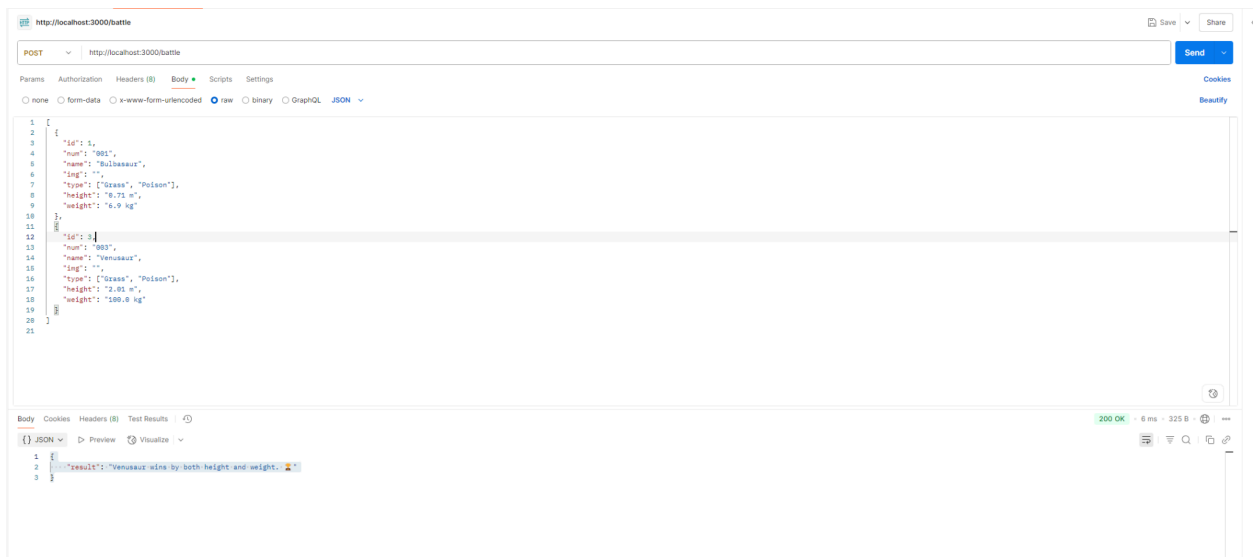

3.)in postman test the post endpoint

http://localhost:3000/battle

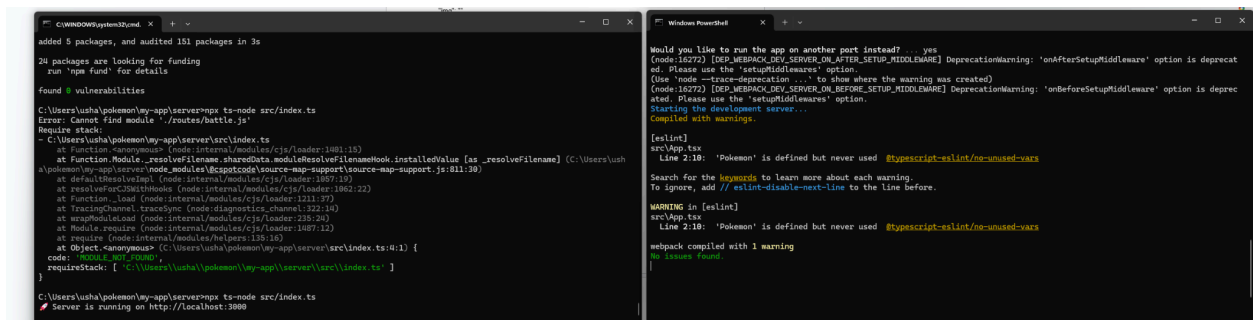

```
[
  {
    "id": 1,
    "num": "001",
    "name": "Bulbasaur",
    "img": "",
    "type": ["Grass", "Poison"],
    "height": "0.71 m",
    "weight": "6.9 kg"
  },
  {
    "id": 3,
    "num": "003",
    "name": "Venusaur",
    "img": "",
    "type": ["Grass", "Poison"],
    "height": "2.01 m",
    "weight": "100.0 kg"
  }
]
```

```
result : {
  "result": "Venusaur wins by both height and weight. 🏆"
}
```

Post man screenshot

4.) to start UI- npm run build and npm start commands should be executed

The output of the application looks like this
